

Single Phase Pad Mounted Transformer

Seatrust Single Phase Pad Mounted Transformers are designed for underground power distribution systems in residential and light commercial applications. Built to ANSI/IEEE standards, they offer reliable performance in a compact, tamper-resistant package.

Key Features

- Compact low-profile design
- Tamper-resistant enclosure (ANSI C57.12.28)
- High efficiency core design
- Bay-O-Net fuse assembly protection
- Pressure relief valve included

Technical Specifications

Parameter	Value
kVA Rating	10 - 167 kVA
High Voltage	Up to 34.5 kV (150 kV BIL)
Low Voltage	120/240 V, 240/480 V
Frequency	50 Hz / 60 Hz
Cooling Class	ONAN (Mineral Oil or FR3)
Standard	ANSI/IEEE C57.12.38
Winding Material	Copper or Aluminum
