

## Three Phase Pad Mounted Transformer

Seatrust Three Phase Pad Mounted Transformers provide robust power solutions for commercial, industrial, and renewable energy applications. These units are engineered to withstand harsh environments and meet global standards including ANSI/IEEE and IEC.

### Key Features

- Dead-front design for operator safety
- Loop feed or radial feed configurations
- Load break switches (2-position or 4-position)
- Liquid level, temperature, and pressure gauges
- Optional stainless steel cabinet for coastal areas

### Technical Specifications

Parameter	Value
kVA Rating	45 - 5000 kVA
High Voltage	Up to 35 kV (200 kV BIL)
Low Voltage	208Y/120, 480Y/277, 415Y/240 V
Frequency	50 Hz / 60 Hz
Cooling Class	ONAN / ONAF (Mineral Oil or FR3)
Standard	ANSI/IEEE C57.12.34 / IEC 60076
Winding Material	Copper or Aluminum
